### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ruthleen Uy on 6/18/10.

The application has been amended as follows:

Please amend claim 4 as follows:

4. (currently amended): A camping reservation method, for making a camping facility reservation, comprising:  
receiving a customer request for making a reservation at a camping facility, including camping vehicle attribute information;  
searching, ~~by a computer processor~~, a camping institution database for information relating to the camping reservation, the database comprising camping pad attribute information of camping facilities belonging to the camping institution; and  
generating, by a computer processor a camping reservation at a camping facility responsive to the customer request; wherein the camping pad attribute information includes information regarding the geographic location and availability of at least one of water and sewer connections on the camping pad.

***Allowable Subject Matter***

2. Claims 1-19 are allowed.
3. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office Action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.
4. The following is an examiner's statement of reasons for allowance. None of the prior art of record either individually or in combination teach the following:

-wherein the camping pad attribute information includes information regarding the geographic location and availability of at least one of water and sewer connections on the camping pad.

The present invention discloses a camping facility reservation method, for making a camping facility reservation. The allowable feature of wherein the camping pad attribute information includes information regarding the geographic location and availability of at least one of water and sewer connections on the camping pad is not disclosed by any prior art reference. The closest prior art, Cahill et al (US 2002/0099574 A1) shows a method of electronically reserving a space for parking a vehicle where availability data and historical data in databases is available to the server during the reservation process. The next closest prior art, Panico (US 2003/0162536 A1) discloses a method that matches a vehicle about to vacate a parking space with a

vehicle searching for parking in that same area. The vehicle searching for a parking space sends a "space requested" message, and the central control system matches a parking space request with a compatible parking space offer. The next closest prior art, Chase (US 2005/0098627 A1), discloses an automated check-in and check-out for a user needing rental space where information for a rental space is provided, a user is provided a way to make a selection of desired information, and entry of data needed to use the rental space is also provided. The system then provides automated reservation check-in/check-out management. The next closest prior art, Inokuchi et al (US 2004/0080510 A1) discloses an information display system in which objects including position information and attribute information different from the position information are stored in a database. Newly cited art, Demchick (US 20050022890 A1) discloses a recreational vehicle equipped with at least one permanently attached exterior water outlet for use in a travel trailer, which shows the configuration of the campsite or campsite arrangement in reference to the location of the utility connections on the recreational vehicle. The next newly cited art, Distler (EP 93197 A2) discloses a container in and in conjunction with camper vans and travelling vehicles and the like, which are connected to the container via a fresh water connection or a waste water connection. However, Cahill et al, Panico, Chase, Inokuchi et al, Demchick and Distler all fail to disclose the feature of wherein the camping pad attribute information includes information regarding the geographic location and availability of at least one of water and sewer connections on the camping pad. This distinct feature has been added to

independent claims 1, 4, 15-17 and 19, and renders them and all claims that depend from them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
